

Proposed Parameters for Public Feedback on Board Items

The Franklin County Board of Education often solicits feedback on proposed policy changes and potential programs. This may involve submission of feedback through an online form linked to our district website.

In an effort to provide consistency with public comments at our regularly scheduled monthly meetings, it is recommended that public feedback forms soliciting input include an expectation that the name, phone number, email and physical address of the provider be completed in order for the school system to verify the commenter. Going forward, forms should be updated to include this additional information.

No personnel or student information, protected by law, will be presented in this forum.

In addition, only policies that are up for formal review will allow for public feedback through the portal. If someone wants to speak regarding a policy not up for review or other issue, they will need to attend a regularly scheduled monthly meeting and sign up for public comment to share.
