

BHS Esser HVAC Vendor Approval

March 13, 2023

Dr. Larry Webb-Chief of Auxiliary Services

ESSER HVAC 3 Year Project

As a reminder, we began a 3 year, \$5,000,000 HVAC renovation project last year. This is funded by ESSER. The BHS project is the last of those projects, slated for completion during the 23/24 school year.* Since supply chains and price increases have been an issue, we have “spec’d,” drawn and bid this project early.

*We are utilizing a combination of new BARD units and new heat pumps. The boiler and one chiller will be removed.

There is \$752,918 left in ESSER funding for this project. The balance for this final project (\$107,082) will come from our Energy Project line during the 23/24 school year.
